

Creation of float glass production

The territory in the industrial zone of Vilnohirs'k is offered for creation of float-glass production..

The territory has favorable logistical infrastructure - access roads and railroad tracks are located at a distance of 100 m. There is also a raw material base for quick start of the project: quartz sand for glass industry produced by the branch "Vilnohirs'k Mining and Metallurgical Plant" of JSC "United Mining and Chemical Company".

Currently Ukraine does not produce float glass.

The project realization is envisaged through location of float-glass production by a profile company, with possible cooperation with a Ukrainian enterprise.

Enterprise to Cooperate with:

«Orion-Glass-Float» LLC
