Urban design initiatives and Master planning

As an independent engineering and architecture company, our task is to rethink urban spaces with an attentive, pragmatic eye on sustainability. We've chosen to be guided by the principles launched by C40 through Reinventing Cities: energy efficiency, assessment of the life-cycle of construction materials, durability and climatic adaptation, sustainable management of water resources, urban reforestation, social inclusion, innovative architecture and urban design, green mobility.

Services

Urban design initiatives and urban renewal (green field and brown field) with a comprehensive approach: mobility design, urbanistic planning, architecture and structure, environment and geotechnic

Transport hub design, Transit Oriented Development (TOD) initiatives

Railway station requalification

Master planning

Mobility analysis at urban level

Competences

Urbanistic

Architecture

Structure

Geotechnic

Environment
