Helpful Official Resources:

MAP OF DAMAGES

<https://recovery.gov.ua/en>

ICEG interests in cooperation with EU associations and companies during peacetime:

- studying legislative basis of consulting engineers activities in EU countries
- other means to enhance quality and transparency in the sector
- finding partners for ICEG member companies with a purpose of future joint implementation of Ukraine recovery projects

Tenders held by International Financial Institutions:

- independent bidding of foreign companies and attracting Ukrainian specialists
- joint bidding of foreign and Ukrainian engineering companies

Foreign companies' operations in Ukraine can be organized as:

- Representative office
- Subsidiary
- Consortium

Biddings for work and service procurements with Ukrainian budgetary funds are held solely via the Prozorro, electronic public procurement system

<https://prozorro.gov.ua/en>

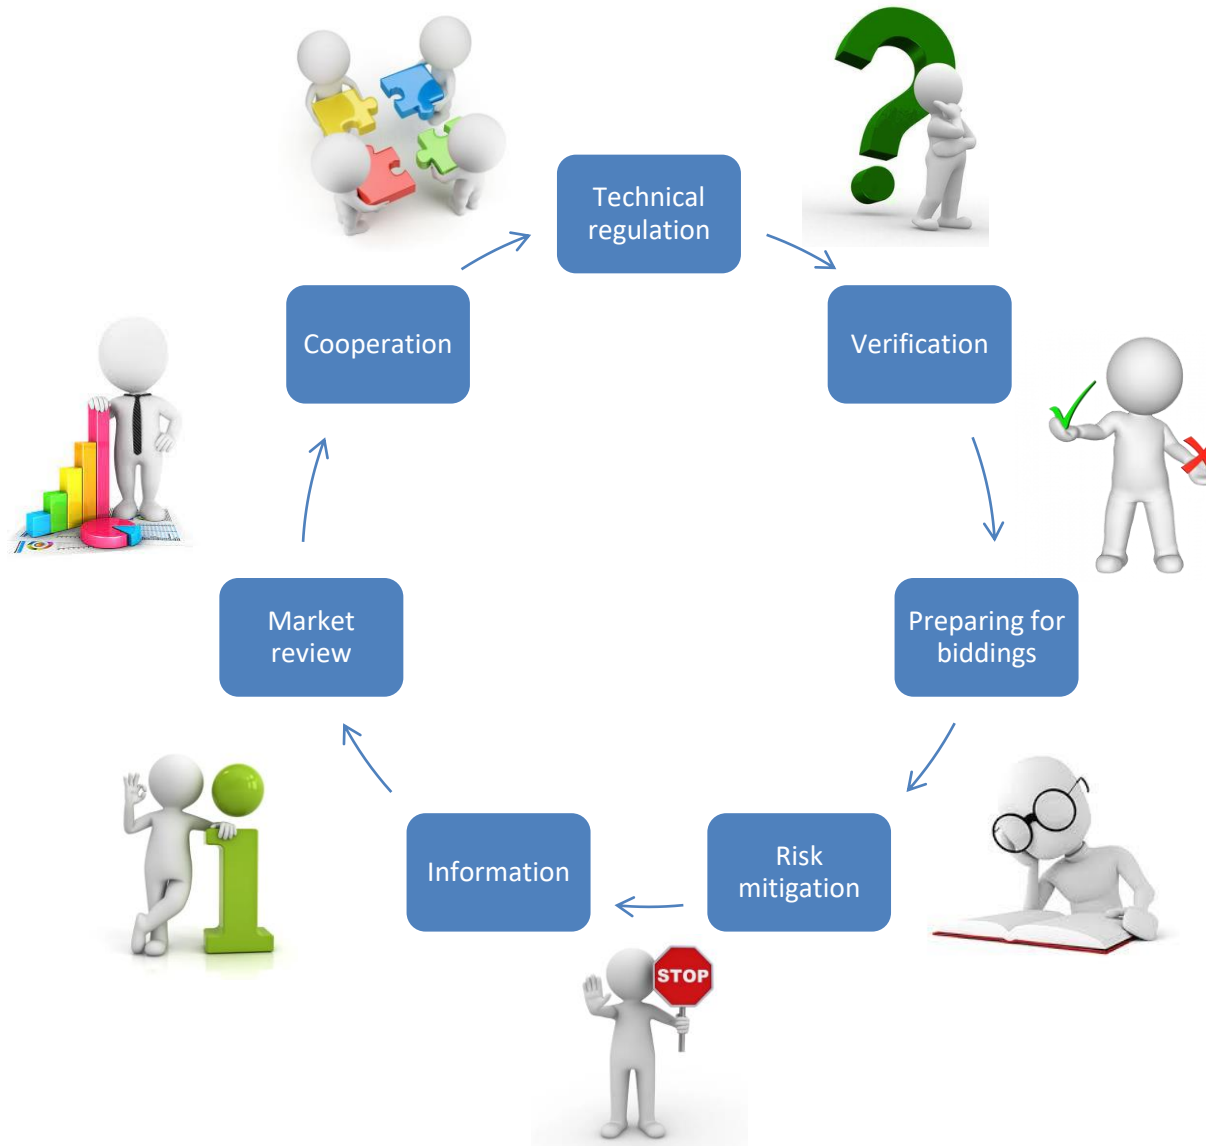

NB!

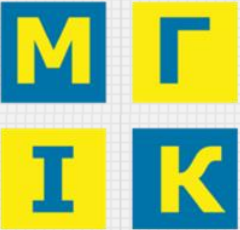

Non-residents of Ukraine can participate in these procurement procedures only if they are registered in Ukraine as an association of companies or a representative office of the company

CONSORTIUM is a temporary statutory association of companies, which is formed for its members to achieve a joint economic goal and shall be registered subject to the Ukrainian legislation

- Bidding in the form of consortium enables the companies to demonstrate their compliance with the client's requirements to their advantage as the accumulated experience of completed projects, financial performance, etc. are evaluated
- The consortium bears joint and several proprietary liability, yet its member companies are liable for the consortium's obligations only within their shares unless the consortium's statute stipulates otherwise
- The consortium provides flexible legal opportunities to mobilize diverse investment resources, accumulate them, and transform into a productive capital
- Companies can be members of several consortiums

Benefits of international cooperation between companies within professional associations
