TOLUSSO COSTRUZIONI

PORDENONE - ITALY

The **new headquarters** of **Tolusso Costruzioni**, recently inaugurated in **Pordenone**, is an important **symbol** of a **forward-looking strategic vision**.

The building, with its **modern** and **welcoming design**, reflects the ideals of **design innovation** that have guided the company's philosophy for years.

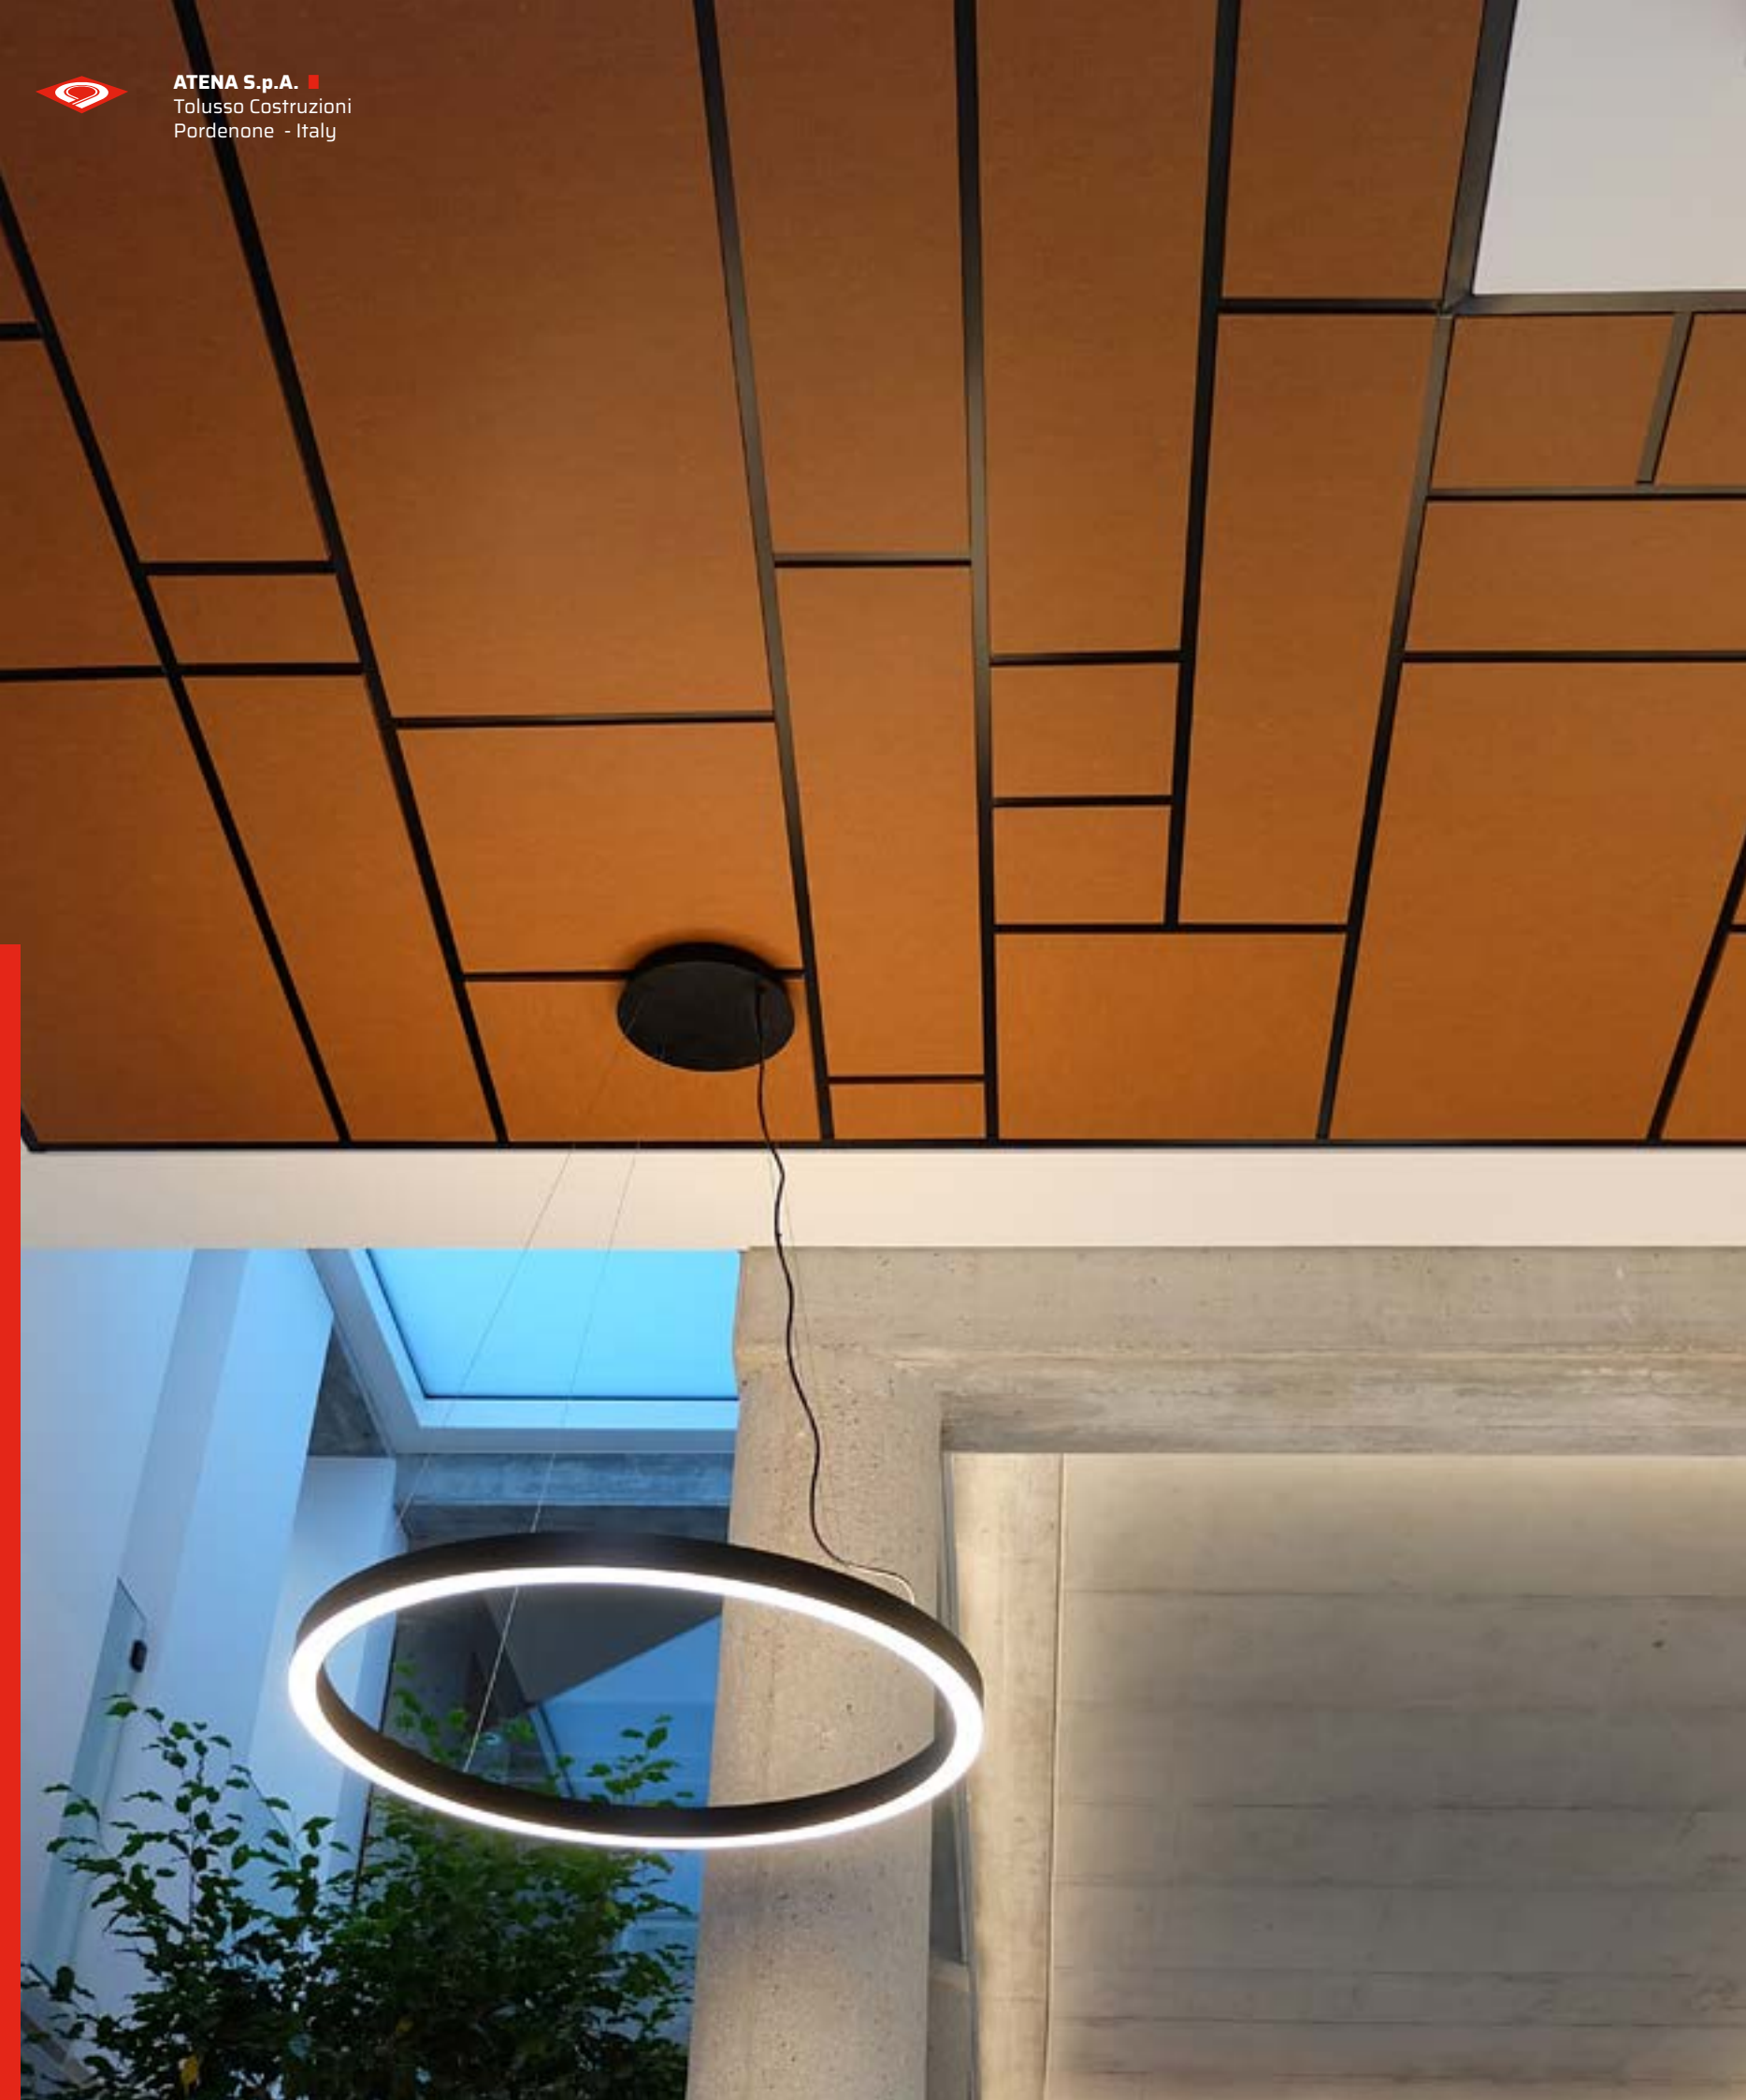

Thanks to its know-how and experience in the construction sector, Tolusso Costruzioni demonstrates operational flexibility and adaptability to different design and construction requirements.

Tolusso Costruzioni

Pordenone - Italy

The particular arrangement of the metal ceiling, using **Atena Multipitch profiles**, was chosen for the **office and conference areas**, resulting in modular suspended ceilings with **panels of various sizes**.

The system consists of a **black Easy Base 24 structure** and **24 Linear Tegular panels** with a **9 mm lowered right angle**, produced in **5/10 pre-painted steel** with a ***faux-corten*** finish.

The Multipitch system stands out for its ability to use panels of varying sizes to create a **modular design** with **high aesthetic appeal**.

As a result, the metal ceiling was made up of panels with sizes of 300x1200, 600x600, 300x300, 300x600, and 600x1200.

ATENA MULTIPITCH

Multipitch by Atena is
a **creative system** and
a **versatile solution** for
creating **unique ceilings**
that may **decorate rooms**
in a **distinctive** and
original way while also
adding an **attractive** and
contemporary touch.
