

ATENA S.P.A. HAS A QUALITY
MANAGEMENT SYSTEM CERTIFIED
BY RINA IN COMPLIANCE WITH
ISO 9001

PACKETA | PRAGUE

Since its foundation in 2010, **Packeta** has established itself as a **reference company** in the field of **logistics for online shops**.

With the aim of simplifying and optimising the parcel delivery process, the company has developed a **strategic network** covering the entire territory of the **Czech Republic**.

Thanks to the integration of state-of-the-art technologies and dedicated customer service, Packeta offers flexible and tailor-made solutions to meet the different needs of retailers and consumers.

Packeta's offices have been fitted with the **Atena metal ceiling grid system**.

Made of **4/10 aluminium**, this metal cell open ceiling has an elegant **RAL 3002 *Carmine Red* finissage**.

The open cell chosen has a **base of 4** and a **height of 18**, with **600x600 mm panels**.

The **open cell metal ceiling** covers an area of **3720 square meters**, creating an effect of **architectural continuity** that gives a **sense of spaciousness** and **unity** to the space.

The **60x60 mm mesh** contributes to a bright environment, enhancing the perception of space and creating a comfortable and professional atmosphere.

Base 4 H18

Thanks to its **integrated support structure**, the **Base 4 H18 open cell metal ceiling** is particularly **elegant and refined**, giving rooms a **continuous and uniform appearance**.
