Production of biodegradable eco-dishware

The project provides for the opening of its own production of biodegradable tableware made of corn starch in Ukraine.

**Project goals**

- Increase in turnover up to \$100,000 per month;
- Expansion of the customer base through the production of new products to order at our own facilities;
- Reducing the cost of production, as well as its cost to the end consumer;
- Increased tax revenues to the local budget;

**Project economic indicators**

- More than \$150,000 invested in the existing company today;
- The company's turnover per month - 30,000 - 35,000 U.S. dollars;
- Product profitability - about 25%;
- Number of employees - 10 people.
- Existing customers of the company - Epicenter, Varus, Subaru, Ferrexpo and others.

It is planned to select, purchase, install and set up a line for the production of disposable biodegradable tableware from corn starch-based polymer. Also the selection and testing of raw materials, rent of production premises, utilities and payment of employees (5 people) in the first month of operation of the enterprise.

Production of biodegradable eco-dishware

- *Grant financing of the project*

Biodegradable tableware applications

Grocery production

Cafes and restaurants

Hotel and beach business

Green Office

Catering

Retail

Additional Information

According to Verified Market Research, the global market for biodegradable tableware was valued at nearly \$3 billion in 2018.

The market is expected to grow by more than 1.5 times by 2025, as measures by developed countries to eliminate the use and consumption of disposable tableware contribute to this growth.
