The effectiveness that makes the difference.

Cosmeceuticals Nutraceuticals Medical Devices

The RPF® (Search Pharmaceuticals) is a pharmaceutical company founded in 2001, located in Caserta (Italy). Specialized in the formulation of natural cosmeceuticals, nutraceuticals and medical devices, the RPF® test clinically its products making use of cooperation with universities and specialized laboratories. The RPF® products, for sale pharmacy, are presented to the medical community through our network of scientific informants.

The natural ingredients in cosmetics and nutrition, in the right concentrations, are now a reality proven effective. RPF® say: "we give to the body what the body knows"; the human body does not know the oil derivatives that represent a continuous and dangerous insult to our well-being. The use of preservatives and synthetic fragrances, often the cause of allergies in susceptible individuals, is minimized in our products.
RPF®'s nutraceuticals, does not contain gluten, so they can be taken without problems also from celiac subjects. The company's team is the result of long experience. The objective is to provide cosmeceuticals, nutraceuticals and medical devices effective, safe and innovative. The products of RPF®, far from being static, are often subject to review and changes where we recognize the opportunity to make them more effective and safe, never satisfied with the excellent quality already achieved but always strive to improve them .

The RPF® with the collaboration of prestigious research institutes, universities, renowned consultants and advanced production laboratories, can boast a range of innovative and proven efficiency products, formulated and manufactured by adopting the latest knowledge in scientific research and according to the latest international guidelines, always striving to provide modern, effective and safe products.

The effectiveness that makes the difference.

PRODUCTS

Anestin®

Specific products for the care of the skin and mucous membranes. Cream, fluid and liquid.

Fidren®

Plant extracts products, elective for the delicate skin of children and the elderly dystrophic ones.

Eladren®

Specific products for the delicate skin, hypersensitive, such as the children's ones.

Matervit® CAPSULE

Complete supplement for pregnancy and lactation. With 150 mg of Magnesium for capsule. In Softgel® capsules. Gluten free.

Ninfagin® BUSTINE

Food supplement with sweeteners based on: Cranberry, Bearberry, Melaleuca. With Inulin. 3120 ORAC units for 2 sachets. Gluten free. Naturally lactose free.

Pantaskin® Plus

Protective cleaner, antiseptic, sebum normalizing. Shampoo-shower.

Eupoderma®

Specific products for the care of the dystrophic skin and "diabetic foot".

Eudren®

Cream, Sachets and Capsules Softgel® to counteract the disorders of microcirculation and edema of the face and body.

Flosil® CAPSULE BUSTINE

Sachets: Devil's claw, Vitamin C, Pineapple, Glucosamine. With Ovomet and Beta-glucan.

Capsules: Curcuma Longa, Nettle, Vitamin C, Vitamin D and Vitamin E. With Bromelain, Omega 3 and Bioperine.

LAURIDYL® CAPSULE

Food supplement: Vitis vinifera, Thiamine, EPA / DHA for normal cardiac function; vitamin C for collagen formation for the normal function of blood vessels; Folic Acid, Vitamin B6 and B12 for normal metabolism of homocysteine; vitamin E Vitamin C and Vitis vinifera for the antioxidant action. With Vitamin K2, Ubiquinol and Niacin.

IDRASTIN®

Hypoallergenic cosmetics for face and body.

RPF®

The effectiveness that makes the difference.

Anestin®

"Dry and irritated mucous membranes and skin do not tolerate alkaline soaps and sensitizing topical treatments."

Anestin® Liquido - It 's a liquid cleaner acting on lipid affinity at physiological pH. It 'a cleaning factor anogenital with strong refreshing and calming properties thanks to the presence of plant extracts, algae and oils that also provide a natural antibacterial and antifungal activities. It does not contain SOAPS and CHLORHEXIDINE.

Anestin® Fluido - Multipurpose treatment for anogenital area acting as a soothing, protective and lubricant product. Useful as moisturizing and lubricating in vaginal dryness and for an emergency cleansing without water. Dermatologically tested.

Anestin® Plus - Soothing, moisturizing and protective cream based on Zinc Oxide, Hyaluronic Acid, Wheat Germ Oil, Amino Acids and Triethyl citrate. Create a non-occlusive protective film.

RPF

Anestin®

Anestin® Liquido

Physiological pH acid detergent for everyday anogenital cleansing. Devoid of soaps, acting on lipid affinity. Without foam.

Package: 125 ml.
Retail price in Italy: € 12,00

Anestin® Plus

Soothing, moisturizing and protective cream based on Zinc Oxide, Hyaluronic Acid, Wheat Germ Oil, Amino Acids and Triethyl citrate. Create a non-occlusive protective film.
Package: 75 ml.
Retail price in Italy: € 19,00

Anestin® Fluido

Topical multipurpose treatment, acting as a soothing, protective and lubricant product, for the anogenital area. Also useful for cleansing without water.
Package: 75 ml.
Retail price in Italy: € 12,00

Fidren® Polvere

Fidren® powder, thanks to the many active substances contained in it (Calendula, rice starch, corn starch, glycine, kaolin, zinc oxide, allantoin, triethyl citrate), guarantees the hygiene of the delicate and sensitive skin, gives the skin protection and softness and helps to improve the state of dystrophic skin. It avoids maceration, hinders the bacterial fermentation of perspiration, prevents the development of unpleasant odors. And it's indicated in all cases in which excessive perspiration and rubbing can cause irritation or unpleasant sensations.

Fidren® powder forms on the skin a dry and uniform film which ensures protection from sweat. It's specifically formulated for armpits, skin folds, anogenital area, between toes. It's suitable for children, seniors, sports, long-term patients, obese, incontinent people. Bacteria present on the skin surface have enzymes that digest the sweat components resulting in the production of particular compounds (free fatty acids) which are the real culprits of our smell. The reaction is preferably carried out by these enzymes in hot humid environment and in the alkaline pH conditions. The Triethyl Citrate, attacked by bacteria present on the skin surface, absorbs, through the formation of complexes, the derivatives of malodorous enzymatic degradation. From the degradation of Triethyl Citrate molecule originates citric acid. Citric acid lowers the pH of the area by preventing the formation of short-chain fatty acid cause of the bad smell.

Fidren®

Fidren® Crema

Adjuvant in acute and chronic disorders of skin and mucous membranes.

Package: 75 ml.

Retail price in Italy: € 15,00

Fidren® Olio

Natural emollient and soothing effect. Only vegetal oils. Restores the skin barrier.

Packages: 100 ml.

Retail price in Italy: € 19,00

Fidren® Polvere

Absorbent and skin protecting. Deodorant for adsorption, not for chemical or fragrance action.

Package: 100 g.

Retail price in Italy: € 16,00

Fidren® Spray

Natural topical soothing treatment for insect bites. It acts also as insect repellent.

Package: 50 ml.

Retail price in Italy: € 10,00

rpf

Eladren®

Eladren® Latte

Eladren® Latte is a creamy cleansing. It cleans without water at physiological acid and protective pH . It cleans with water at neutral pH. It ensures a soothing and protective effect on skin and mucous membranes when applied after cleansing. Eladren® Latte cleanses for lipid affinity and not for foaming action. It 's a universal cleansing cream: suitable for cleansing the face and body, the newborn and the elderly. The cleaning effect is promoted by specific water-soluble plant extracts and oils that make the product multifunctional as it acts both without water and with water. It operates deep cleansing of the skin, frees the pores of impurities and gives the skin freshness and a better appearance.

Indications: Eladren® Latte has soothing and refreshing properties. Formulated for daily hygiene of the skin and mucous membranes. It is easily removable with water or with cotton wool. It's suitable for sensitive skin. It keeps the skin soft, clear and gives a feeling of well-being and facial cleansing.
How to use: Without water with cotton wool. With water is used in place of soap for a gentle cleansing without foam.

On skin and mucous membranes, previously cleaned, massaging a small amount of product it will form a nourishing protective film.

It does not contain: alcohol, mineral oil, lanolin, parabens, nickel, chromium, and other heavy metals.

rpf

Eladren®

Eladren® Liquido

Physiological acid pH cleanser with emollient and protective action for delicate and dystrophic skin.

Package: 500 ml.

Retail price in Italy: € 15,00

Eladren® Latte

Creamy cleanser for the face and body of the mother and child. Cleans with or without water.

Package: 200 ml.

Retail price in Italy: € 16,00

Eladren® Emulsione

Fluid emulsion nourishing, soothing and anti-itching. Elective in case of dystrophic and irritated skin .

Package: 200 ml.

Retail price in Italy: € 18,00

Eladren® Crema Multiattiva

Eladren® Crema Multiattiva is an innovative multifunctional product that smoothes wrinkles and brightens the skin, summarizing in itself valid dermatological purposes; action exfoliating and rejuvenating is associated with average photoprotection to prevent and treat the damage of photoaging.

Its formulation makes this beauty cream a unique product where the moisturizing action, firming and photoprotective effects are associated with the lightening, anti-aging and firming actions promoted by three new components, chosen for their specific characteristics and actions on the skin: the Azeloglicina®, the Pepha-Tight® and Matrixyl 3000®.

Eladren® Crema Multiattiva, applied morning and evening after a light scrub cleanser, protects the elastic fibers from denaturation caused by free radicals and inhibits inflammation determined by exposure to environmental agents: hot-cold-wind-sun, etc. Also it restricts and prevents damage due to exposure to UVA / UVB, reduces skin dryness ensuring a lasting hydration .

The Eladren® Crema Multiattiva, thanks to the valuable and complex formulation, is useful to prevent skin aging . Designed to give new life to tired skin and marked by time, it is also ideal for young skin. Reduces wrinkles with a lifting effect, whitening, improving thickness, firmness and radiance of the skin. Eladren® Crema Multiattiva is elective to reduce hyperpigmentation making uniform the skin's color .

Package: 75 ml.
Retail price in Italy: € 34,00

Firming and anti-aging effects, lightening and moisturizing actions are exercised by Matrixyl 3000®, Azeloglicina®, Pepha-Tight® and Trealix®. With average photoprotection. Dermatologist tested.

Indications: Prevention and Control of chronological skin aging (dryness and skin spots, wrinkles and expression lines) and protection from damage caused by external environmental factors (free radicals, sunlight...). Eladren® Crema Multiattiva , for cosmetic lifting effect, is indicated for the face, neck and chest.

Matervit
CAPSULE

Matervit®Capsule

Multivitamin, multimineral complete for pregnancy and lactation, with 150 mg of magnesium 1 capsule.

Package: 30 capsules Softgel®

Retail price in Italy: € 13,50

Therapeutic efficacy of Matervit® Capsule during Pregnancy and Lactation.

Authors: Giuseppe Vetrano, Federica D'Itri, Nizam Mohammad Aboulkhair, Patrick Messina, Vincenzo Aleandri Department of Gynecological Sciences, Perinatology and Childcare, University of Rome "La Sapienza."

Conclusions

Respectively integration of Iron, Vitamin C and magnesium, such as that present in the Matervit® (30 mg, 70 mg, 150 mg) is able to reduce the incidence of anemia, especially in the last trimester of pregnancy and prevent muscle disorders , such as cramps and an increase in blood pressure. The presence of high doses of Magnesium in synergistic action with Vitamin B6, zinc and copper, makes the Matervit® elective to alleviate premenstrual syndrome taking two capsules a day.

Pantaskin® Plus

Cleanser rich in trace elements in acid solution, with principles with strong anti-microbial and anti-fungal actions

The cleansing action is promoted by a mixture of amphoteric and non-ionic surfactants that provide gentle and sanitizing action on the skin, in addition to spread the product's active principles.

Characteristics of the main components of **Pantaskin® Plus**:

- **Piroctone olamine**, functional substance with sebum normalizing action;
- **Water-soluble sulfur**, eudermic purifying substance. Its topical use ensures good results in the treatment of skin problems such as psoriasis, eczema and dermatitis in the various forms; particularly effective in the treatment of ringworm;
- **Acetic acid**, acidifying with particular anti-microbial properties. It 'used to treat irritations caused by contact from jellyfish and in the case of proliferations of various insects;
- **Melaleuca alternifolia**,plant with antimicrobial and fungicidal activity, acting also on body odor;
- **Citric acid**, acidity and pH adjuster.

Pantaskin® Plus is complemented by soothing and refreshing ingredients such as:

- **Rice starch**, with recognized gelling and soothing;
- **Panthenol**, softening and moisturizing;
- **Urea**, moisturizing and softening.

Formulated to ensure a sanitizing cleansing, Pantaskin® Plus is recommended for use by the guests of communities, elderly, disabled, sports in the gym and in the pool.

LAURIDYL®

CAPSULE

Several factors can affect the balance of the cardiovascular system and the vascular endothelial function by altering the production of chemical mediators capable of adjusting the diameter and the elasticity of the vessels. The chemical mediators can be distinguished in vasodilators, which possess anti-proliferative, anti-thrombotic and anti-atherogenic effects, and vasoconstrictors, which instead have opposite function. Endothelial alterations arise when prevail pro-coagulant and pro-inflammatory activity . While a poor diet, poor lifestyle habits (sedentary lifestyle, etc ...) can cause a level of cholesterol accumulation predisposing vascular thrombotic events of various kinds, depending on the district in which they're going to happen (the lower limbs, heart, brain). Healthy eating habits, an active lifestyle, the limitation in the use of alcohol and smoking, can help reduce the occurrence of these alterations.

Key component characteristics:

QH®: reduced, active form of Coenzyme Q10 (CoQ10). It is absorbed directly by the body because more bioavailable of CoQ10. The use of statins is in connection with a low endogenous production of Coenzyme Q10 for inhibition of 3-hydroxy-3-methylglutaryl-coenzimaA (HMG-CoA) reductase.

Omega-3 (EPA+DHA): contribute to support normal cardiac function. The beneficial effect is obtained with a daily intake of 250 mg of EPA and DHA, as recommended by the European Food Safety Authority (EFSA).

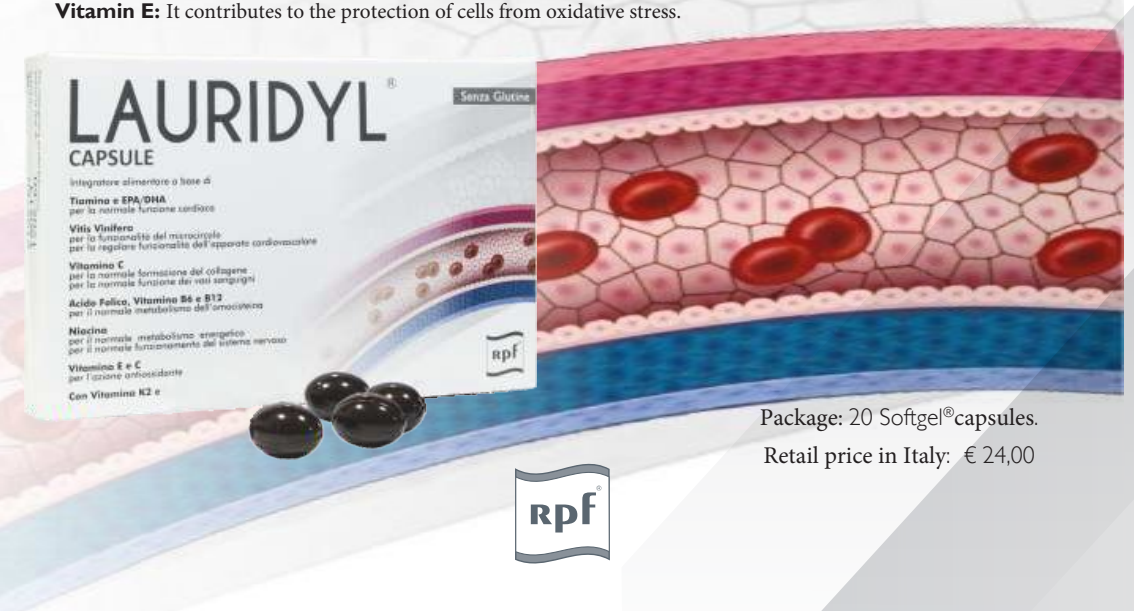

MenaQ7®: Fat-soluble vitamin K2, in the form of Menaquinone-7, conveys to the bone system the Calcium in the blood circulation helping to maintain healthy bones, as well as to prevent the Calcium storage in the arteries.

Folic acid, vitamins B6 and B12: contribute to normal homocysteine metabolism.

Enovita™: extract with 95% content in procyanidins, it helps to maintain a normal blood pressure.

Ester C®: Vitamin C patented, characterized by high bioavailability and a neutral pH that makes it well-tolerated at the gastrointestinal level. It contributes to normal collagen formation for the normal function of blood vessels.

Vitamin E: It contributes to the protection of cells from oxidative stress.

Package: 20 Softgel®capsules.

Retail price in Italy: € 24,00

IDRASTIN Gemme

Regenerating serum in single dose Vegicaps with Haloxyl pure Retinol at 0.03% in Microsponge and Vitamin E. Contrasts wrinkles and imperfections around the eyes.

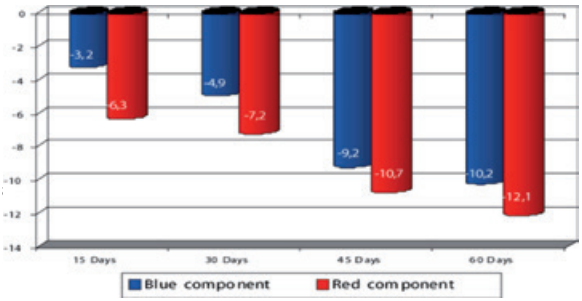

Dermatologically tested

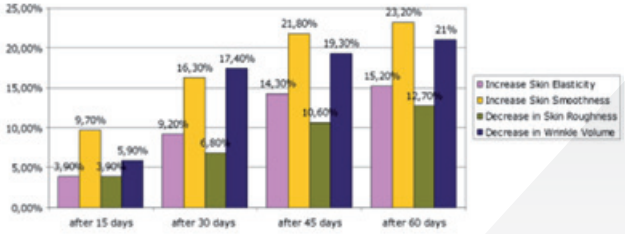

www.errepieffe.it

IDRASTIN®

Contrasting and reducing the wrinkles and dark circles around eyes with active ingredients in controlled-release: Idrastin® Gemme.

A next-generation topical serum designed for the daily care of the skin around the eyes and face.
Idrastin® Gemme carries out a bump for combat wrinkles and contour eyes imperfections, especially the darkening of the periocular zone, and it is also suitable in the cosmetic treatment of rosacea.
In particular the presence of Haloxyl ™ (combination of 3 active ingredients which act synergistically) it strengthens and tones the eye area, supports the microvascular network and reduces the phenomena of darkening. In vitro studies show that this component supports the natural process of elimination of pigment residues and relieves inflammation charged to the microcirculatory system. The formulation also has the valuable combination of Vitamin E and pure Retinol 0.03% in Microsponge® that regulates cell renewal, minimizes the surface wrinkles and makes the skin smooth and promotes the production of collagen improving skin elasticity. The original mix of elements reduces the visibility of the capillary layer in the suborbital area, promotes the removal process of melanin granules through cell renewal, stimulates collagen synthesis improving skin elasticity and inhibits the oxidative processes caused by ultraviolet. The effectiveness of the formulation is supported by a controlled release system Microsponge® that provides the skin the right amount of active ingredient on time. The single doses of Idrastin® Gemme (Vegicaps® Soft) contain the right amount of product for each application, thus avoiding the risk of contamination caused by repeated contact with people and environment.

IDRASTIN®

The results of in vitro study on Idrastin®Siero and Idrastin®Gemme

They are the result of a collaborative project between the Research Society Microna srl and the Center for the Evaluation of Toxicologic Risk of the University of Milan in order to assess the potential of cosmetic products for topical use through the use of reconstructed human skin models (EpiDerm ™, EpiDerm Full Thickness ™). The products subject to the investigation were Idrastin® Siero and Idrastin® Gemme. Idrastin® Siero showed a recovery of 388.71% and the data obtained suggest that the formulation proves to possess a good **protective activity** of keratinocytes. Idrastin® Gemme instead, showed a recovery of 237.10% and also for this formulation can evaluate a protective activity of keratinocytes. For **regenerating effect**, with Idrastin® Siero we have seen a 40% increase in collagen release in medium; a 10% increase in the release of collagen in tissue. After 5 days of treatment, in medium: 80% increase compared to the baseline and in the tissue: + 12% compared to baseline. After 8 days of treatment: in medium additional increase of 20% and in the tissue + 10% compared to baseline. Overall: + 40% collagen release in the medium and + 10% in the tissue. After 5 days of treatment with the formulation Idrastin® Gemme in the medium: more than 100% increase from baseline and in the tissue + 39% compared to baseline. And yet, after 8 days of treatment, in the medium a further increase of 56% . Overall the increase of collagen release was 70% in the medium and of 18% in the tissue. The study authors have reached the conclusion that this study has amply demonstrated protective-regenerating-antinflammatory activity of the two products designed for topical use and their densification action of the dermis .

IDRASTIN®

Cleansing:

Personal Hygiene Act - Cathartic Anti-Stress Ritual - Social need, improvement of Relationship Life - The cleansing is the removal of dirt.

The exogenous dirt comes from environmental contamination and lies on "hydro-lipid film", which is on the stratum corneum, moisturizing it, giving it mechanical protection and allowing the development of bacterial flora resident.

The endogenous dirt comes from tissue debris and from sebaceous and sweating secretions .

A very useful practice is to add products for cleansing substances to specific DERMO-FUNCTIONAL activities like, for example, antibacterial disinfectants (chlorhexidine, undecylenic acid, piroctone olamine) or plant extracts with anti-inflammatory, soothing, antimicrobial (beta-enoxolone, mimosa tenuiflora, melaleuca alternifolia). To counteract the alkalinity phenomena are added weak organic acids and to preserve hydration are used replacement of the hydro-lipid film (film-forming).

CLEANSING NOT BALANCED MAY INDUCE A SERIES OF ALTERATIONS SUMMARIZED AS FOLLOWS:

Alteration of the skin pH - Alteration of the skin flora - Dehydration and increased TEWL (trans-epidermal water loss) - irritating action - sensitizing action.
These imbalances are correlated with a chain reaction: the delipidation resulting in the removal of substances dispersed in the hydro-lipid film involves the pH changes, and changes in skin flora, as well as dehydration and exposure of the stratum to physical and chemical aggressive agents (peeling, fissures), loss of barrier function, direct toxic phenomena with the release of chemical mediators of inflammation. Besides factor to an irritant dermatitis, such alterations induce the possibility of allergic sensitization in susceptible individuals. The stay on the skin of salts of Ca^{2+} and Mg^{2+} fatty acids, insoluble in water, can lead to occlusion of the follicular and the sweat ducts (Folliculitis Miliaria).

Cleansing gel face / body with micro-spheres of Jojoba and Alpha Hydroxy Acids to purifying and sebum-normalizing action.

Package: 200 ml.

Retail price in Italy: € 16,00

IDRASTIN®

Idrastin® Levigante Corpo

Gel cream with Glycolic Acid 20%, for regenerating and anti-aging, high keratolytic power. Thanks to its exfoliating effect, which weakens the intracellular ties in the stratum corneum, the Glycolic acid accelerates cell tropism: the dead cells are replaced by younger cells, making a deep restructuring of the skin, making it more moisturized and smoother. Particularly suitable in cosmetic treatment of small scars, dry skin, stretch marks.

Indications: Moisturizing, smoothing and rejuvenating treatment for the body. Indicated to mitigate the roughness of the body and as a cosmetic treatment of stretch marks after childbirth, dietary and slimming cures.

Idrastin® Levigante Corpo

Cream gel, with glycolic acid to 20%, for regenerating, surface smoothing and elasticizing effects.

Package: 200 ml.

Retail price in Italy: € 38,00
